

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Türkiye. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—that really helps shape a thoughtful answer. At 16 in Denmark, just after finishing primary school (typically 9th or 10th grade in **folkeskole**), you're at a key decision point. You have a few main educational paths to choose from, and the best one depends on your **interests, goals, and learning style**.

Here's a quick overview of your main options, followed by some personal guidance:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university.

- **STX** (*Studentereksamen*): Broad academic focus (humanities, science, social science). Great if you enjoy traditional school subjects and might want to go to university.
- **HHX** (*Higher Commercial Examination*): Focus on business, economics, marketing. Ideal if you're interested in business or international trade.
- **HTX** (*Higher Technical Examination*): Focus on technology, science, and innovation. Great if you like engineering, IT, or design.
- **HF** (*Higher Preparatory Examination*): Shorter (2 years), more practical academic program. A good choice if you want a university path but prefer a more flexible approach.

✓ Choose a **gymnasial** program if:

- You enjoy academic work
- You're considering **university** in the future
- You're not sure exactly what job you want yet

2. Erhvervsuddannelse (Vocational Education and Training – VET)

This combines school with hands-on training in a real job (like an apprenticeship).

You can become anything from:

- **Electrician**
- **Plumber**
- **IT supporter**
- **Chef**

- **Hairdresser**
- **Mechanic**
- And many more...

✓ Choose VET if:

- You want to **start working sooner**
- You prefer **practical learning**
- You have a specific job or trade in mind

Bonus: You still have the option to continue to higher education later through **EUX** or **vocational pathways**.

✨ What might suit you?

Let me ask a few quick questions to better guide you:

1. Do you like school subjects like math, science, or languages?
 2. Do you prefer **theory** (reading/writing/studying) or **practical tasks** (doing/building/making)?
 3. Do you have any dream jobs in mind? (doctor, programmer, chef, business owner, etc.)
 4. Are you interested in working in Denmark, Türkiye, or internationally?
-

🌍 Cultural advantage

You speak Danish fluently, and you have Turkish roots — that gives you a **cultural and language advantage**. If you're interested in business, international relations, tourism, or tech, this background could be a real strength in your career.

Once you answer a bit more about your interests, I can suggest specific schools or programs in Denmark that match your strengths. But even now, I'd say:

- If you like studying and want to keep your options open: **STX** or **HHX** is a solid next step.
- 🔧 If you prefer working with your hands or want a faster path to a job: **VET (Erhvervsuddannelse)** might be a better fit.

Want help comparing schools near where you live? I can look those up too.
