

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Türkiye. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question — and a big moment in your life, so it's smart to think carefully about your next steps.

Since you're 16 and just finished primary school in Denmark, you're likely now choosing between different **youth education programs ("ungdomsuddannelser")**. In Denmark, you typically have a few main options:

♦ 1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

If you're interested in continuing your education after youth education (for example, university), then gymnasium might be the right path.

- **STX (Almen studentereksamen):** Broad education with focus on humanities, natural sciences, and social sciences.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, IT, and math.

Best for you if: You enjoy academic subjects and may want to go to university later.

♦ 2. EUX – Vocational + Academic Hybrid

EUX combines a vocational education (like becoming an electrician, carpenter, or IT technician) with subjects from gymnasium. So you get both **hands-on job skills** and a **study-qualifying diploma**.

Best for you if: You want to keep your options open — start working early or go to university later.

♦ 3. EUD – Vocational Education (Erhvervsuddannelse)

This is a more practical education path, where you train directly for a specific job (e.g., mechanic, chef, hairdresser). It includes school periods and apprenticeships.

Best for you if: You want to work with your hands, start earning earlier, and don't enjoy academic classroom work as much.

♦ 4. IB (International Baccalaureate)

If you're really strong in English and want an international path, the IB diploma is taught in English and is accepted worldwide.

Best for you if: You want to study abroad later, or prefer an international environment.

Things to Ask Yourself:

- Do I like academic schoolwork or more practical learning?
 - Do I want to go to university someday?
 - What are my strengths? (Math, languages, tech, creativity?)
 - Do I want to work in business, science, trades, art, tech, etc.?
-

Based on what you shared:

You're fluent in Danish, were raised in Denmark with Turkish roots, and just finished primary school. That gives you **a strong cultural and linguistic base**, which can be an advantage in many fields.

If you like school and might want to continue to higher education, **STX or HHX** could be great. If you're more practical and career-focused, **EUX** is an amazing flexible option.

Would you like to tell me more about:

- Your favorite school subjects?
- Your interests or dream jobs?
- Whether you're more into hands-on work or classroom learning?

Then I can give you a more tailored recommendation!
