

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ukraine. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background—you're in a good position to make a smart choice about your future, and it's great that you're already thinking ahead. Since you're 16, finished primary school in Denmark, and fluent in Danish, here are your main **educational paths** in Denmark after **folkeskolen** (primary and lower secondary school):

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – Academic)

These are general education programs that prepare you for university.

Options:

- **STX** (Alment Gymnasium): Broad academic subjects – good if you're not sure what to study later.
- **HTX** (Teknisk Gymnasium): Focuses on science, tech, and IT.
- **HHX** (Handelsgymnasium): Focuses on business, economics, and languages.
- **HF** (Higher Preparatory Exam): Shorter 2-year academic program – usually for those who didn't go directly from 9th to gymnasium.

Good for you if:

You enjoy academic subjects and are thinking about university later.

🔧 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

These programs prepare you for a specific profession (e.g., electrician, carpenter, hairdresser, social- and health care worker).

You spend time both at school and as an apprentice in a company.

Good for you if:

You prefer practical work or want to get a job faster and don't want to go to university right away.

💡 3. EUX – The Best of Both Worlds

This combines vocational training with a gymnasial-level education. You get a trade and still qualify for university.

Good for you if:

You want a practical job option *and* the possibility of higher education later.

Tips to Decide:

Ask yourself:

- Do I like school and studying academic subjects?
- Do I enjoy working with my hands or in real-life environments?
- Am I already interested in a specific career (tech, healthcare, trades, business)?
- Would I like to go to university one day?

✨ Personal Suggestions (based on your background):

- Being bilingual and multicultural (Danish + Ukrainian) is a strength. You could consider **HHX** if you're interested in international business, economics, or marketing.
- If you're hands-on and like real-world work, **EUX** is a smart, flexible path.
- If you're still unsure, **STX** keeps the most doors open.

If you tell me more about your **interests, strengths, or what you imagine doing in the future**, I can give you a more tailored recommendation.
