

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ukraine. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and you're thinking about your next steps, that's a great place to start planning your future. At 16, you have several good educational paths available depending on your interests, strengths, and career goals. Here's a breakdown of your main options in Denmark:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education – General)

These programs prepare you for university and offer a more academic path.

Main options:

- **STX (Almen studentereksamen)** – Broad, academic, with focus on humanities, natural sciences, and social sciences.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international relations.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – Shorter (2-year), more flexible, often for people who want a more practical academic route.

Good if you:

- Want to go to university later.
- Like academic subjects (math, languages, science, etc.).
- Are not yet sure what career you want and want to keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school with hands-on work experience (apprenticeships), and you get a trade or profession.

Fields include:

- Health care (e.g. social- og sundhedsassistent)
- Technology and IT
- Carpentry, electrician, mechanic
- Business, sales, and administration
- Culinary arts (e.g. chef)

Good if you:

- Prefer hands-on learning.
- Want to enter the job market faster (often in 3–4 years).
- Are interested in a specific trade or profession.

3. Kombinationsuddannelser (EUX – Vocational + Academic)

This is a mix between vocational and academic education. You get both a trade and a study-qualifying exam.

Good if you:

- Want the flexibility to work in a trade **or** go to university.
- Are academically strong but still want practical experience.

How to choose?

Here are some questions to help guide you:

- Do you enjoy school subjects and studying, or do you prefer more practical work?
- Do you already have a career goal or are you still exploring?
- Would you like to go to university someday, or are you more interested in working sooner?

Example Paths:

- **If you're good at school and curious about many subjects:** STX or HTX.
- **If you're interested in tech or engineering but want practical skills too:** HTX or EUX.
- **If you want to work with your hands or get into a job faster:** EUD.
- **If you're still figuring things out but want a flexible future:** HF or EUX.

Would you like to tell me more about your interests or subjects you enjoy? I can then give a more personalized suggestion.
