

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Arab Emirates. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and you're at an important point in your life—so it's good that you're thinking carefully about your next step. Since you're 16, just finished primary school (what's usually called "**folkeskole**" in Denmark), you likely have several options ahead of you. Here's a breakdown of your main educational paths and some recommendations based on different interests:

🎓 Main Educational Paths After Folkeskole in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education – for academic focus)

These are good if you want to go to university later.

- **STX** (Studentereksamen): General academic education with a wide range of subjects. Good for university.
- **HHX** (Higher Commercial Examination): Focus on business, economics, and international trade.
- **HTX** (Higher Technical Examination): Focus on science, technology, and IT.
- **HF** (Higher Preparatory Examination): Shorter (2-year), more flexible. Suitable if you're unsure or took a gap year.

Recommendation:

Choose this path if you're aiming for **university**, enjoy academic subjects, or want a broad range of options later.

If you like science or tech, **HTX** might be ideal. If you're into business or international topics, **HHX** could be great—especially given your UAE background, which might give you an edge in international business.

2. Erhvervsuddannelser (EUD) – Vocational Education and Training

This is for those who want to start working earlier, learning a trade or profession (e.g., carpenter, mechanic, hairdresser, chef, IT support).

You combine school with **paid internships (læreplads)** in real companies. You can still later take supplementary education (e.g., **EUX** or **Erhvervsakademi**).

Recommendation:

If you like practical work, or want to earn money while studying, this is a strong option. Especially if you want to become skilled in a trade or start your own business later.

3. EUX – a mix of vocational + academic education

You get both a **vocational qualification** and a **higher academic level** (like gymnasium). It's longer, but gives you **job opportunities AND the ability to study further** later.

Recommendation:

Ideal if you want **hands-on experience** now, but also keep the door open to university or further studies later.

How to Choose?

Ask yourself:

- Do I want to go to university later?
 - Do I enjoy hands-on/practical work more than theory?
 - Do I want to work soon or focus on studies?
 - Am I interested in science, business, languages, arts, or tech?
-

My Recommendation (based on what you shared):

- If you like **academic subjects** and may want to study further, consider **STX** or **HTX**.
 - If you're into **business or international affairs**, **HHX** would suit you very well, especially considering your multicultural background.
 - If you're not sure yet and want both hands-on and academic flexibility, **EUX** is a strong and future-proof choice.
-

Would you like help narrowing this down based on your interests (e.g., tech, health, arts, business)? I can also help you look at specific schools or programs near where you live.
