

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Kingdom. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—it's great that you're thinking ahead! Since you've just finished primary school in Denmark and you're fluent in Danish, you're in a strong position to choose between several good educational paths. Here's a breakdown of your main options after **Folkeskole** (Danish primary and lower secondary school), with recommendations based on different interests and goals:

🎓 Main Educational Options After Folkeskole in Denmark:

1. Gymnasiale Uddannelser (Upper Secondary Education) – 3 years

These are academic paths preparing you for university.

- **STX (Almen Studentereksamen):** General upper secondary with a broad mix of subjects – ideal if you're unsure what to specialize in yet.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international trade – great if you're interested in business or global studies.
- **HTX (Higher Technical Examination):** Focus on science, tech, and engineering – great if you're into STEM fields.
- **IB (International Baccalaureate):** An international program taught in English – a strong fit for someone with UK roots who may consider university abroad.

Recommendation:

If you're academically inclined and want to keep university options open (in Denmark or abroad), **STX** or **IB** would be strong choices.

IB might be especially good for you because:

- It's in English
- Recognized internationally
- Could connect well with your UK background

2. EUD / EUX (Vocational Education and Training) – 2 to 5 years

Hands-on, career-oriented programs that combine school and apprenticeships.

- **EUD:** Direct path into a profession (e.g., carpenter, chef, hairdresser).

- **EUX:** Mix of vocational training and academic education – gives you a studentereksamen too, so you can also apply for university.

Recommendation:

If you like practical learning and want to start working sooner—but still want the option to study later—**EUX** is a great option.

Ideal if you're interested in fields like tech, health care, trades, or business.

 Special Note: Considering the UK

Because your parents are from the UK, you **might** be eligible for citizenship or dual citizenship. That could open up study options in the UK later on. Choosing **IB** or a program with strong English skills could make that path smoother.

 How to Decide

Ask yourself:

- Do I want to go to university? → Choose STX, HTX, HHX, or IB.
 - Do I prefer learning by doing and getting a job sooner? → Choose EUD or EUX.
 - Do I want to keep doors open in Denmark and abroad? → IB or EUX.
-

If you'd like, I can help you explore schools in your area, give advice based on your interests (science, art, business, etc.), or even help you think long-term (e.g., career planning or studying abroad). Just let me know!
