

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Republic of Tanzania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you just finished **primary school in Denmark** at 16, it sounds like you're now about to enter **upper secondary education**. In Denmark, after **folkeskolen**, you have several good options depending on your interests, strengths, and future goals. Here's a breakdown of your main paths and what each could lead to:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for **university or other higher education** later.

Options:

- **STX (Studentereksamen)** – broad academic focus (languages, sciences, social studies).
- **HHX (Higher Commercial Examination Programme)** – focus on business, economics, and international trade.
- **HTX (Higher Technical Examination Programme)** – focus on science, technology, and design.
- **HF (Higher Preparatory Examination)** – a shorter, 2-year academic program; more flexible.

✓ Choose this if:

- You enjoy academic subjects.
- You're open to going to university later.
- You want a broad education with many options.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These prepare you for **specific trades or careers** and combine school with practical work (apprenticeship).

Fields include:

- Health and social care
- Technology and IT
- Business and administration
- Construction and mechanics

- Culinary, design, etc.

✓ Choose this if:

- You prefer hands-on learning.
- You want to start working earlier.
- You're interested in a practical career (e.g., electrician, carpenter, hairdresser, social worker).

♦ 3. Kombinerede forløb (EUX)

A combination of **vocational education** and **academic education**. It gives you both a trade qualification and the right to apply for higher education.

✓ Choose this if:

- You want both job skills **and** the option to go to university.
- You're hardworking and can handle a busy program.

🕒 How to Decide?

Ask yourself:

- Do I enjoy school subjects and want to keep studying? → **STX / HTX / HHX / HF**
- Do I want to work with my hands or in a specific job soon? → **EUD**
- Do I want a mix of both? → **EUX**
- What are my long-term dreams (e.g., university, job security, travel, working with people, etc.)?

💡 Bonus Tips:

- You can talk to a **studievejleder (student advisor)** at your current or future school.
- Visit **uddannelsesguiden.dk (UG.dk)** – Denmark's official education guide. It has tools to help you choose based on interests.
- Don't feel pressure to have it all figured out now. Many paths can lead to the same place later.

If you tell me more about:

- Your interests (science, business, social work, arts, etc.)
- What you enjoy doing (reading, building things, helping people, etc.)
- Whether you're thinking of university one day

...I can give you a more personalized suggestion.
