

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Republic of Tanzania. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (which typically means 9th or 10th grade), your next step will usually be one of the upper secondary education options. Here are the main paths you can take—and I'll give recommendations based on your background, interests, and future opportunities.

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for you if you're interested in university or higher education later:

▶ STX (Studentereksamen)

- Focus: Broad academic subjects – languages, humanities, social sciences, natural sciences.
- Great for: Keeping all options open, especially if you're not sure yet what you want to do.
- Language bonus: If you're fluent in Danish and have a multicultural background, languages like English, French, or even Swahili (if offered informally) could be strong subjects for you.

▶ HHX (Higher Commercial Examination)

- Focus: Business, economics, marketing, international trade.
- Great if: You're interested in business, economics, or possibly entrepreneurship (even in a global context, like connecting Denmark and Tanzania!).

▶ HTX (Higher Technical Examination)

- Focus: Technology, science, innovation.
- Great if: You're into science, computers, or engineering.

▶ HF (Higher Preparatory Examination)

- Focus: Shorter (2-year) academically oriented program.
- Great if: You want a more flexible path to university, or if you want a bit more time to figure things out.

♦ 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This path trains you for a specific job and combines school with paid internships.

- Focus: Trades, healthcare, childcare, technology, IT, etc.
- Duration: 2-5 years depending on the program.
- Great if: You prefer hands-on learning or want to work sooner.

You can also later take **EUX**, which combines vocational training with subjects at the gymnasial level—so you keep the door open to university later.

◆ 3. IB (International Baccalaureate)

- Taught in English, internationally recognized.
- Great if: You might want to study abroad in the future, or prefer an international environment.

Recommendations Based on You:

Given your background:

- **You speak Danish fluently**, which gives you full access to all public education in Denmark.
- **Your Tanzanian roots** could give you unique insights or interests (maybe in international relations, languages, development, or business between Europe and Africa).
- **You're only 16**, so don't worry if you're not 100% sure what you want yet—pick something that keeps your options open **unless** you have a strong interest already.

If you're academically interested but unsure:

👉 **STX or HHX** are solid choices. STX if you want to explore a broad range of subjects; HHX if you're curious about business or international commerce.

If you prefer practical, hands-on learning:

👉 **EUD or EUX** in a field you enjoy (like IT, design, healthcare, etc.).

If you're globally minded and want to study in English:

👉 Consider **IB**.

Would you like help deciding based on what you're good at or enjoy? I can help match your interests with a specific program or suggest schools near you.
