

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United States. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great point in life to be thinking about your future — and it's good that you're reflecting on it early. Based on what you've shared, here are several educational paths you could consider in Denmark, each with their own benefits depending on your interests and goals:

♦ 1. Gymnasium (STX, HHX, HTX) – General Upper Secondary Education

This is the most common next step after primary school in Denmark for academic-oriented students.

Types:

- **STX (Almen studentereksamen):** General academic high school. Good if you're unsure what you want yet — broad focus.
- **HHX (Handelsskolen):** Focus on business, economics, and international trade. Great if you're into commerce or management.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and innovation. Ideal if you're into engineering or science.

Leads to: University or other higher education.

Recommended if: You enjoy academic subjects and want the option to go to university later.

♦ 2. Erhvervsuddannelse (EUD) – Vocational Education and Training

A mix of school and apprenticeship in a company. You learn a trade and can start working relatively soon.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef

- IT Support

 **Leads to:** Direct employment or optional higher education (e.g., **Erhvervsakademi** or **EUX** if you want a blend of academic and vocational learning).

 **Recommended if:** You prefer hands-on work or want to enter the workforce sooner.

♦ 3. EUX – Hybrid of Vocational Training and Gymnasium

This combines vocational training (EUD) with general upper secondary education, giving you both a trade and access to higher education.

 **Leads to:** Both job opportunities and the ability to apply for university.

 **Recommended if:** You're practical, but still want the option of university later.

♦ 4. International Options

Since you have U.S. citizenship through your parents and are fluent in English and Danish, you could consider:

- **International Baccalaureate (IB)** in Denmark
- **Moving to the U.S.** later for university
- **Study abroad programs** in English-speaking countries

 **Leads to:** International higher education flexibility.

 **Recommended if:** You're globally minded, considering studying abroad, or want an internationally recognized diploma.

✨ How to Choose?

Ask yourself:

- Do I enjoy theory or practical work more?
 - Do I want to go to university later?
 - Am I drawn to business, tech, science, art, or trades?
 - Do I want to stay in Denmark or possibly study abroad later?
-

If you're not sure yet, starting in **STX** or **IB** keeps the most doors open.

If you tell me a bit more about your **interests**, **hobbies**, or **career dreams**, I can help you choose more specifically!
