

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uruguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background—you're at an important turning point! In Denmark, after finishing **folkeskolen** (primary and lower secondary school), you have a few different educational paths depending on your interests, strengths, and future goals. Here's an overview of your main options, with some advice tailored to your situation:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic and lead to higher education. There are several types:

a. STX – Studentereksamen (General Upper Secondary)

- Broadest education: languages, sciences, humanities.
- Great if you're not sure what to study later.
- Strong path to university.

b. HHX – Higher Commercial Examination Programme

- Focus on business, economics, and languages.
- Good for careers in marketing, international trade, business, etc.
- Might be a nice bridge if you want to connect Denmark and Uruguay in business someday.

c. HTX – Higher Technical Examination Programme

- Emphasis on science, technology, and innovation.
- Great if you like subjects like math, IT, physics, or design.

d. HF – Higher Preparatory Examination

- Shorter (2 years).
- More practical and flexible.
- Good if you want to finish faster or have a specific goal.

✅ Recommended if:

You want to keep your options open for university or are academically strong/interested in a wide range of subjects.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Learn a profession through a mix of school and paid apprenticeship (praktik).
- Examples: electrician, carpenter, chef, hairdresser, social worker assistant.
- You can earn while you learn and get a job quickly.
- There's also **EUX**, which combines vocational training and general subjects so you can still go to university later.

Recommended if:

You enjoy hands-on work, want a job quickly, or have a specific trade in mind.

3. International Options

Since you have Uruguayan roots, you might also consider:

- Taking Spanish or international programs if you're interested in working abroad later.
- Some Danish schools offer **IB (International Baccalaureate)**, which is in English and internationally recognized.

Recommended if:

You see yourself studying or working internationally or want to strengthen your connection to your Latin American roots.

What to think about when choosing:

- What subjects do you enjoy most?
 - Do you prefer theory (reading, writing, studying) or practical learning (hands-on work, projects)?
 - Do you want to go to university later, or start working earlier?
 - Do you want to explore your Latin American heritage or stay more focused in Denmark?
-

Suggestion Based on You:

Given that you're fluent in Danish, born and raised in Denmark, and have a multicultural background, a **gymnasial education (STX or HHX)** could be a great starting point. HHX especially might suit you if you're curious about business or using your Danish-Uruguayan background in an international context. If you're more practical and know what career you'd like (e.g. electrician, chef, tech repair), then **EUD or EUX** can get you into a job faster.

Let me know what subjects or activities you like—then I can give you more specific suggestions!
