

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uruguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—you're in a great position to make some exciting choices! Since you've just finished primary school in Denmark and are 16 years old, you're likely deciding between different upper secondary education paths (ungdomsuddannelser). Here's a breakdown of the main options available in Denmark, along with suggestions depending on your interests and future goals:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for higher education (e.g., university or professional academies). You choose one depending on your interests:

► STX (Almen studentereksamen)

- **Best if you're unsure about your future plans** or want a broad education.
- Focuses on humanities, natural sciences, and social sciences.
- Great for university pathways.

► HHX (Højere handelseksamen)

- **Ideal if you're into business, economics, or languages.**
- Strong focus on international trade, marketing, and finance.
- Prepares well for business schools or jobs in private sector.

► HTX (Højere teknisk eksamen)

- **Good fit if you like science, technology, IT or engineering.**
- Includes technical subjects alongside general education.

► HF (Højere forberedelseseksamen)

- A shorter 2-year program (vs. the usual 3 years).
- **Suitable if you want a quicker route to further education or if you didn't thrive in a traditional school setting.**

🔧 2. Erhvervsuddannelser (Vocational Education and Training / EUD)

- **For practical, hands-on learning**—if you'd prefer to get into the workforce earlier or learn a skilled trade.
 - You can become everything from an electrician, carpenter, chef, to social and health care worker.
 - Many programs offer **"EUX"** which mixes vocational training with academic courses so you can still go to university afterward.
-

Other Factors to Consider

- **Are you more academic or practical?** Do you like studying or prefer working with your hands?
 - **Do you want to go to university later?** If yes, gymnasiale uddannelser are the path.
 - **Do you have interests in entrepreneurship, technology, helping others, art, etc.?** Your interests can guide your direction.
 - **Language advantage:** Since you have roots in Uruguay, you likely speak or understand Spanish. That can be a big plus in international studies or business-related education.
-

My Recommendation (based on your age, Danish fluency, and Uruguayan background):

If you're open to academic studies and not sure what you want to be yet, **STX** or **HHX** could be the best fit:

- **STX** if you want a broad and flexible education with access to all university programs.
- **HHX** if you like the idea of international business or using your Spanish in global work.

However, if you're more hands-on or want to start working earlier, **EUX** gives you both options—practical training and the possibility to pursue higher education.

Would you like help matching your interests or career goals to a specific education track? I can also guide you in choosing electives or specialization lines (studieretninger) once you pick a path.
