

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Vanuatu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark (which usually ends after **9th grade**), you're at a really important point where you choose your next educational path. Here are the main **options available in Denmark** after primary school, and how you might think about which one fits you best:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic and prepare you for **university**.

Options:

- **STX** (Studentereksamen): Broadest academic focus (humanities, sciences, social studies).
- **HHX** (Higher Commercial Exam): Focuses on business, economics, and international trade.
- **HTX** (Higher Technical Exam): Focuses on technology, IT, and natural sciences.
- **HF** (Higher Preparatory Exam): Shorter (2 years), more practical and mature students often attend.

Good if:

- You enjoy school subjects and might want to go to **university** later.
- You're not sure yet what you want to do long-term and want to keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and **hands-on apprenticeships**.

Examples:

- Carpenter, electrician, hairdresser, mechanic, chef, social and health care worker.
- Takes around 3.5–4 years.

Good if:

- You enjoy **practical work**.
- You want to start earning money relatively soon.
- You're not super interested in academic school subjects.

3. Kombination: EUX

A mix of vocational training + academic classes. Gives you **both** a trade and a qualification for university.

Good if:

- You like both **practical and academic work**.
- You want to become, for example, a technical engineer, business professional, or healthcare specialist but keep options open.

Other Options (if you're unsure or need time):

- **10th grade** (efterskole or regular): If you want an extra year to mature, get stronger in school, or think about what to choose next.
- **Efterskole**: A special school where you live for a year – focuses on personal development, special interests (like sports, music, design, etc.).

Based on What You Shared:

You're fluent in Danish, you've grown up in Denmark, and you're finishing primary school now — so you're in a strong position. Since you have a multicultural background, you might also bring a unique perspective to your future studies or career.

Here are **some guiding questions** to help you choose:

- Do you enjoy **academic subjects** like math, languages, science, or history?
- Or are you more into **practical or creative work** (like building, designing, helping people, using your hands)?
- Do you want to go to **university**, or would you rather start working sooner?
- Would you like to study something that connects with **international work, technology, or creative fields**?

If you're still unsure:

I recommend looking into:

- **EUX** – if you want to keep doors open to both work and university.
- **10th grade at an efterskole** – to discover your interests in a fun, social, and supportive environment.

Would you like me to suggest specific schools or programs near where you live in Denmark? Or would you like help exploring career paths that might suit your interests and strengths?
