

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Vanuatu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead about your education! In Denmark, after finishing **Folkeskole (primary and lower secondary school)** around the age of 16, you typically have a few main options, depending on your interests, academic strengths, and career goals.

Here's a breakdown of your choices and some guidance based on your situation:

♦ 1. Gymnasiale uddannelser (Upper Secondary Education)

These are for students aiming to go to university eventually. There are different types:

* STX (Almen studentereksamen)

- General upper secondary education with a broad range of subjects.
- Good if you're not yet sure what you want to study later.
- Prepares you well for university.

* HHX (Højere handelseksamen)

- Focus on business, economics, and international trade.
- Ideal if you're interested in business or entrepreneurship.

* HTX (Højere teknisk eksamen)

- Focus on science, technology, and innovation.
- Great if you like STEM (science, tech, engineering, math).

* HF (Højere forberedelseseksamen)

- A 2-year program (vs. 3 years for the others).
- Often for students who want a shorter, more practical route to higher education.

Recommendation:

If you're academically strong and might want to go to university later, **STX** is the most general and flexible. If you're interested in business or tech, **HHX** or **HTX** might suit you better.

♦ 2. Erhvervsuddannelser (Vocational Education & Training - EUD)

- More hands-on, practical training.
- You combine school with an apprenticeship (læreplads).
- Leads directly to jobs like electrician, carpenter, chef, mechanic, or social worker.

Recommendation:

If you prefer doing things rather than sitting in a classroom all day, and want to start working earlier, this is a strong choice. Denmark has a respected vocational system, and some VET programs can also lead to higher education later.

♦ 3. Kombinationsforløb / EUX (Hybrid Path)

- A mix of vocational training and general upper secondary education.
- Gives you both a studentereksamen **and** a trade qualification.
- Good if you want the option to work **or** go to university.

Recommendation:

If you're a practical learner but still want the door open for future study, **EUX** is a fantastic compromise.

✅ What Might Fit You Best?

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, you have access to all the same opportunities as any other student.

Ask yourself:

- Do I like academic subjects and want to go to university later? → **STX/HHX/HTX**
- Do I want to work sooner and learn by doing? → **EUD**
- Do I want both options? → **EUX**

Also consider what *you enjoy*:

- Like business? → **HHX**
- Like science or tech? → **HTX**
- Like helping people or doing practical work? → **EUD** with a social or healthcare focus.

Next Steps

1. **Visit an educational guidance center (UUV vejledning)** – they can offer personal help.
2. **Check out the "Optagelse.dk" website** – used for applying to youth education.
3. **Talk to a counselor at your school or kommune** – they can guide you on options and application deadlines.

If you tell me more about your interests (what subjects you like, what jobs you find exciting), I can give you a more personalized recommendation.
