

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivarian Republic of Venezuela. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've completed primary school and are thinking ahead—planning your next steps now gives you more control over your future.

In Denmark, after primary school (**folkeskole**), you typically have several educational options depending on your interests, academic strengths, and future goals. Here's a breakdown of the main paths you can consider:

1. General Upper Secondary Education (Gymnasiale uddannelser)

These programs are best if you're thinking about going to university later.

Options include:

- **STX (Studentereksamen)** – General academic focus (sciences, humanities, social sciences).
- **HHX (Højere Handelseksamen)** – Business, economics, marketing.
- **HTX (Højere Teknisk Eksamen)** – Technology, science, engineering.
- **HF (Højere Forberedelseksamen)** – Shorter, more practical (2 years), good if you're unsure or want to go to professional bachelor programs.

Good for you if:

You enjoy academic subjects and want to keep university open as an option.

2. Vocational Education and Training (EUD – Erhvervsuddannelse)

These programs combine school with apprenticeships. You learn a trade (e.g., carpenter, electrician, healthcare worker, chef) and can start working right after.

Good for you if:

You like hands-on work, want to earn money during your studies, and are interested in a specific trade.

3. EUX – A Combination of Vocational and Academic Education

This lets you **learn a trade AND get a study qualification**, like STX.

Good for you if:

You want the option to work in a trade **and** later study at university or a professional college.

Choosing What's Right for You

Ask yourself:

1. **Do I enjoy school and want to keep studying academically?**
 - → Consider STX, HHX, HTX, or HF.
2. **Do I prefer learning by doing, and maybe working sooner?**
 - → Look at EUD or EUX.
3. **Do I know what I want to work with yet?**
 - If not, HF or STX can give you more time and flexibility to figure it out.

Special Considerations for You

Since your parents are from Venezuela and you're bilingual or multicultural, you might:

- Be interested in **international business (HHX)** or **languages/humanities (STX)**.
- Use your background as an asset—many companies value people who can connect across cultures.
- Consider careers in **diplomacy, NGOs, translation, teaching**, or **international law** if that interests you.

Next Steps

1. **Talk to your school's counselor (UU-vejleder)** – They can help you choose.
2. **Visit open house events (Åbent Hus)** at local schools.
3. **Try a short internship (praktik) or bridging course (brobygning)** to test your interest.

Would you like a suggestion based on your interests (like science, business, social work, creative fields, etc.)? I can help match programs to what excites you.
