

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Viet Nam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a really important decision, and it's great that you're thinking carefully about your future. In Denmark, after primary school (folkeskole), you have several educational paths you can choose from, depending on your interests, strengths, and career goals.

Here are your main options, with advice tailored to your situation:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academically focused and prepare you for university.

Main types:

- **STX (Studentereksamen):** Broad and academic. Good if you're unsure but want to keep your options open.
- **HHX (Handelshøjskoleeksamen):** Focuses on business and economics.
- **HTX (Teknisk studentereksamen):** Focuses on science and technology.
- **HF (Højere Forberedelseksamen):** Shorter (2 years), more direct path to further education, often for more mature students or those who want to switch fields.

Recommended if:

- You enjoy studying subjects like languages, history, math, science, or economics.
- You think you might want to go to university later.
- You're fluent in Danish and want to build a strong academic foundation.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and apprenticeship (praktik) and lead directly to a job.

Examples:

- Electrician, carpenter, chef, hairdresser, IT-supporter, etc.

Recommended if:

- You want to work sooner and like hands-on, practical tasks.
- You enjoy learning by doing rather than studying books all day.
- You're interested in a specific trade or craft.

You can still take additional courses later (e.g., EUX) to qualify for higher education if you change your mind.

3. EUX – Vocational + Academic

This is a mix of EUD and gymnasium – you get both a vocational qualification **and** the option to go to university.

Recommended if:

- You want a job-oriented education, but also want to keep university options open.
 - You're ambitious and ready for a challenge – it's demanding!
-

How to Decide?

Ask yourself:

- What subjects do I enjoy most?
 - Do I want to work soon, or study more before working?
 - Do I prefer practical work or academic study?
 - Am I considering university?
-

Personal Note (based on your background)

Being fluent in Danish and having a multicultural background can be a huge asset. If you like languages or international topics, **STX or HHX** could be great paths. If you're more technically minded, **HTX or EUX** might suit you better. And if you're eager to start working, **EUD** in something like IT, hospitality, or mechanics can be a strong choice too.
