

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Yemen. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing! You're in a really exciting position right now — you're standing at the beginning of many paths, and Denmark offers a lot of solid options depending on your interests, skills, and goals. Here's a breakdown of the main educational paths after primary school (folkeskole), followed by some suggestions based on different types of interests:

Main Educational Paths in Denmark After 9th or 10th Grade

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for university:

- **STX (Almen studentereksamen)** – Broad, academic, good if you enjoy humanities, science, or social studies.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focuses on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – A 2-year program, often used as a second chance or for older students.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

For practical, job-focused paths. You train both at school and in a workplace (apprenticeship system).

- Includes trades like electrician, carpenter, mechanic, chef, health care worker, etc.
- You can also move on to further education afterward if you want.

Suggestions Based on Your Interests

- **If you like science, tech, or design:**
 Consider **HTX** — it gives you a strong foundation for engineering, IT, or design careers.
- **If you're into business, marketing, or international trade:**
 **HHX** is a great choice. Especially helpful if you might one day connect Denmark and Yemen through business or trade.
- **If you enjoy reading, history, or social issues:**
 **STX** will give you the broadest academic training. It's great if you're still exploring or want to keep university options open.
- **If you prefer learning by doing:**
 A **vocational education (EUD)** might be for you — for example, if you want to become a

mechanic, chef, electrician, or do social/health care work. You can earn money during your education and still continue studying later.

Bonus Tip: Use Your Unique Background

Being bilingual and from a multicultural background is a strength! Consider paths that involve language, intercultural understanding, or even international work — these could include:

- International business (HHX)
 - Social work or teaching (STX + teacher education)
 - Translation, diplomacy, or journalism (STX + university)
-

Next Steps

1. **Try “UddannelsesGuiden”** (www.ug.dk) – it's the official education guide in Denmark, with quizzes and overviews.
 2. **Talk to an education counselor (studievejleder)** at your school or local youth education center (UU-vejledning).
 3. **Visit open house events** at local gymnasiums or vocational schools.
-

If you tell me a bit more about your interests, I can give you a more personal suggestion too! What are your favorite subjects, hobbies, or dream jobs?
