

Uddannelsesmuligheder efter 9. klasse

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Yemen. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking ahead about your education. Since you've just finished primary school in Denmark (which typically means you've completed **9th grade**), you have several educational options to consider depending on your interests, strengths, and future goals.

Here's a breakdown of your main paths, along with some advice:

🎒 1. Gymnasiale uddannelser (General upper secondary education)

These are academically oriented and prepare you for **university**. Choose this if you're interested in more theoretical learning and think you might want a **bachelor's or master's degree** later on.

Options:

- **STX (Almen studentereksamen):** Broad focus — good if you're unsure what you want to study later.
- **HHX (Højere handelseksamen):** Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen):** Focus on science and technology.
- **HF (Højere forberedelseseksamen):** Shorter (2 years) and more practical. Good if you want a faster route to vocational education or university.

Best for you if:

You enjoy school subjects like math, science, history, or languages and are open to going to university later.

🔧 2. Erhvervsuddannelse (Vocational education)

These programs combine school and apprenticeship. You'll train for a **specific job**, such as electrician, carpenter, hairdresser, IT supporter, chef, etc.

Length: Usually 3–5 years

Outcome: You get a skilled trade qualification and can work right away — or later take further education like **EUX** or academy degrees.

EUX: A version of vocational training that also gives you a **studentereksamen**, so you can still go to university afterward.

Best for you if:

You like hands-on work, want to start working sooner, or prefer learning by doing.

Still unsure?

You can also take a **10th grade** (optional) at a local school or **efterskole** to explore more subjects, mature personally, and get ready for the next step. Some use this year to:

- Improve academic performance
- Make new friends
- Decide what education fits them best

Tips to help you decide:

- **What do you enjoy?** Think about your favorite subjects or hobbies.
- **Do you want to work soon or study longer?**
- **Talk to a school counselor (UU-vejleder).** They can help based on your grades, personality, and goals.
- **Visit schools.** Many offer orientation days ("åbent hus").

Example paths:

1. **You like science and want to be an engineer:** → HTX → University (e.g., DTU)
2. **You like business and want to start a company:** → HHX → Business Academy → Maybe university
3. **You like hands-on work and want to earn money soon:** → Erhvervsuddannelse (e.g., electrician)
4. **You're unsure and want to keep your options open:** → STX or 10th grade

If you tell me what your favorite subjects are, or what careers you find interesting, I can help you narrow it down more specifically!
