

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zambia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking carefully about your future. In Denmark, after finishing primary school (folkeskole), you have several educational paths to choose from depending on your interests, strengths, and career goals. Since you're 16 and have finished folkeskole, here are your main options:

## 1. Gymnasiale Uddannelser (Upper Secondary Education)

These prepare you for university or other higher education.

- **STX (Almen studentereksamen)** – Broad academic program with subjects like humanities, science, and social science.
  - Good if you're unsure and want to keep doors open.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and languages.
  - Ideal if you're interested in business or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and IT.
  - Great for engineering, tech, or science careers.
- **HF (Højere forberedelseseksamen)** – A 2-year general education program.
  - More flexible, for students who may not want a 3-year commitment.

 **Recommended if you want to go to university later.**

## 2. Erhvervsuddannelse (Vocational Education and Training - VET)

Learn a trade and start working faster. These include apprenticeships (praktik) and school learning.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Healthcare worker

👉 **Recommended if you want hands-on work and a skilled job without going to university.** You can always take a higher education route later through **EUX** or **EUD+**.

---

### ⚙️ 3. EUX – Vocational + Academic Combo

This combines a vocational education with subjects from the gymnasium level.

- You become both skilled in a trade **and** get qualifications to apply to university.
- Takes a bit longer (4-5 years) but keeps all your doors open.

👉 **Perfect if you want both practical skills and the option for higher education.**

---

### 🌍 Personal Considerations

Based on your background:

- Being bilingual (Danish + potentially English or Bemba/Nyanja) is a big advantage.
  - If you're interested in helping people or representing diverse perspectives, social science, healthcare, or international business could be a good fit.
  - Do you enjoy hands-on work, or prefer academic studies? That will help guide your choice too.
- 

### 🕒 Final Thoughts

If you're **unsure**, I recommend:

- Visiting an **educational guidance center (UU-vejledning)** in your kommune.
- Attending open house events at local gymnasiums or vocational schools.
- Taking a **personality or career interests test** (you can ask your school or UU-vejleder for help with that).

Would you like help exploring a specific area like tech, healthcare, business, or creative arts? I can also recommend programs or schools based on your interests.
