

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Zimbabwe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking ahead about your future. Since you've just finished primary school in Denmark (which typically means 9th or 10th grade in the Danish **folkeskole** system), you're at the point where you need to choose your next educational step. Here's a clear breakdown of your options, with some advice tailored to your background and strengths:

Main Educational Paths in Denmark After Primary School

1. Gymnasiale Uddannelser (General Upper Secondary Education) – 3 years

These are academic programs that prepare you for university:

- **STX (Almen studentereksamen):** Broad subjects — good if you're unsure about your future career.
- **HHX (Højere handelseksamen):** Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen):** Focus on science, tech, and innovation.
- **HF (Højere forberedelseseksamen):** Shorter 2-year program for those who prefer a more practical approach.

✓ Good choice **if you enjoy school subjects** like math, language, science, or social studies and want to go to university.

2. Erhvervsuddannelser (Vocational Education and Training - EUD/EUX) – 2-5 years

- Combines **apprenticeship** with schooling.
- Leads to jobs like electrician, carpenter, hairdresser, chef, mechanic, social worker, etc.
- **EUX** lets you get both a vocational diploma *and* access to university later.

✓ Great if you're **hands-on**, like to work practically, and want to earn money during your training.

How to Choose?

Ask yourself a few questions:

Question	If YES...	Suggested Path
Do you enjoy school and academic subjects?	✓	STX / HHX / HTX / HF
Do you want to go to university one day?	✓	STX / HHX / HTX / HF / AUX
Do you prefer practical learning or working with your hands?	✓	EUD / AUX

Question	If YES...	Suggested Path
Are you interested in business and economics?	✓	HHX / EUX business track
Are you interested in science, computers, or technology?	✓	HTX or EUX tech programs
Not sure what to choose yet?	✓	STX or HF (keeps doors open)

Your Background as a Strength

Being from a Zimbabwean family and fluent in Danish gives you a **multicultural perspective**, which is **very valuable** in education and future jobs. You could also consider:

- **International careers or studies** (maybe with English or global studies in STX)
- **Working in diplomacy, NGOs, or development aid**
- **Entrepreneurship** — many people with roots in different cultures succeed as business owners

Personal Recommendation

Since you're still young and have lots of options open, I recommend:

- **STX or HHX, if you're academically strong** and want to explore more.
- **EUX** if you want **both** a skilled trade and the **option to study later**.
- **EUD** if you want to get into work sooner and enjoy practical work.

Also:

- Visit **educational fairs** or **talk to a school counselor** (Studievejleder).
- Ask to **visit schools** or take part in intro weeks ("brobygning").

If you tell me more about your interests (e.g., subjects you like, dream jobs, hobbies), I can give an even more specific suggestion. Would you like that?
