

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iran (Islamic Republic of). I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing that—you're at an important and exciting turning point. Since you've just finished primary school in Denmark (folkeskolen), the next step typically involves choosing a youth education path. Your decision should reflect your interests, strengths, and future goals, but I'll guide you through the main options and considerations.

🎓 1. Choose a Type of Youth Education (Ungdomsuddannelse)

In Denmark, after 9th or 10th grade, students usually choose between two main paths:

A. General Upper Secondary Education (Gymnasiale Uddannelser)

These are suited if you're considering higher education (university, professional bachelor's, etc.) later:

- **STX (Almen Studentereksamen)** – Broad and academic, with humanities, sciences, and social sciences.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focus on natural sciences and technology.
- **HF (Højere Forberedelseseksamen)** – Shorter and more focused, often for students who need a more practical/structured approach to higher education.

Best for you if:

You're academically inclined or unsure about your exact career path but want to keep your university options open.

B. Vocational Education and Training (Erhvervsuddannelser – EUD/EGU)

These are more hands-on and combine school with practical experience through apprenticeships.

- Examples: carpenter, electrician, social and health care assistant, IT supporter, mechanic, chef, etc.

Best for you if:

You prefer practical learning, want to work sooner, or are interested in skilled trades or technical professions.

🕒 2. Consider Your Interests & Strengths

Here are some questions to guide you:

- **Do you enjoy school and academic subjects like math, literature, science, or languages?**
→ Consider STX, HHX, or HTX.

- **Are you interested in technology or engineering?**
→ HTX or a tech-focused vocational education.
- **Do you want to start working earlier or in a specific trade?**
→ Look at vocational training.
- **Are you unsure about university but want to keep options open?**
→ HF can be a good middle ground.

3. Your Background as a Strength

As someone with both Danish and Iranian roots, you're bringing a multicultural perspective, which is a great asset in many fields. Being fluent in Danish and likely having some knowledge of Farsi can be valuable in careers like:

- International business or diplomacy
- Law or social work
- Medicine or psychology (helping diverse communities)
- Education or translation

4. Action Steps

1. **Talk to your school counselor** (UU-vejleder) – They help students figure out the best path based on your skills, interests, and options nearby.
2. **Visit an educational fair or open house** at local gymnasiums or vocational schools.
3. **Try a “brobygning” (bridge-building course)** – short trial programs to test different types of schools before deciding.
4. **Check online resources like ug.dk** – Denmark’s official education guidance site.

Final Tip

No matter what you choose now, remember that your path is flexible. Many people change direction later—and that’s totally okay. The key is to choose something that feels right **for you now**, and adjust as you grow.

If you tell me more about your interests or subjects you enjoy, I can help you narrow it down even more!
