

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Micronesia (Federated States of). I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a big and exciting moment in your life — congratulations on finishing primary school! Since you're in Denmark and just completed **folkeskolen**, you have several solid educational options ahead of you. I'll walk you through the main paths, and then we can explore which one might be a good fit for *you*, based on your interests, skills, and long-term goals.

Main Educational Paths After Primary School in Denmark

1. Gymnasium (General Upper Secondary Education)

- **Options:** STX, HHX, HTX, HF
- **Duration:** Usually 3 years (HF is 2 years)
- **Leads to:** University (bachelor's degree)

Type	Focus	Best for Students Interested in
STX	General academic (languages, science, humanities)	A broad education leading to university
HHX	Business, economics, international trade	Business, marketing, management
HTX	Science, tech, engineering	Technology, IT, engineering
HF	Shorter, more practical	Quicker route to further education (or for adults)

✓ **Recommended if** you're good at academics and might want to go to university later.

2. Erhvervsuddannelse (VET – Vocational Education and Training)

- **Duration:** 3–5 years depending on program
- **Leads to:** A skilled job (or later university via EUX)
- **Fields:** Healthcare, IT, carpentry, mechanics, hairdressing, and many more

✓ **Recommended if** you want to start working sooner, prefer hands-on learning, or have a specific trade or job in mind.

You can combine this with **EUX** if you want both a vocational diploma *and* the option to go to university later.

3. International or Alternative Programs

- **Efterskole** (boarding school for one year)
- **IB (International Baccalaureate)** — more international-focused

- **10th grade (10. klasse)** — optional extra year if you're not ready to choose yet

✓ **Recommended** if you want more time to decide or want a different environment.

Some Questions to Think About

- Do you enjoy academic subjects (like science, literature, or math)?
- Do you prefer learning by doing, or by reading and writing?
- Do you want to work soon, or go to university later?
- Are you interested in practical jobs (like electrician, chef, nurse) or more academic careers (like doctor, engineer, teacher)?

With Your Background in Mind

Being from a Micronesian background in Denmark is a unique strength. If you're fluent in Danish and multicultural, you might consider:

- International business (HHX)
- Health or social work (VET – healthcare assistant, pedagogue assistant)
- Tech or science (HTX)
- Or even **EUX** to keep doors open for both jobs and university.

✓ A Few Personalized Paths

If you're still unsure:

- **10th grade + career guidance** — Many schools offer career counseling during 10th grade.

If you're interested in university later:

- **STX** or **HTX** (depending on whether you like science or humanities more)

If you want a job quicker but keep the option for university:

- **EUX** (e.g., **EUX Business**, **EUX Tech**)

If you prefer working with your hands:

- **Vocational training (VET)** in a trade or service you enjoy

If you can tell me more about:

- What subjects or activities you enjoy
- Whether you want to go to university

- If you have any dream job or field

...I can give you an even more specific recommendation 😊
