

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Türkiye. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! At 16 in Denmark, you're at a key point in your educational journey. Since you've just finished **primary/lower secondary school (Folkeskole)**, your next step usually involves choosing between several types of **youth education** (ungdomsuddannelse), based on your interests, goals, and strengths.

Here are the **main educational paths** you can consider:

1. General Upper Secondary Education (Gymnasiale uddannelser)

These prepare you for university.

Options:

- **STX (Studentereksamen)** – Broad academic focus (sciences, humanities, languages, social sciences).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere Teknisk Eksamen)** – Focus on technical and scientific subjects.
- **HF (Højere Forberedelseksamen)** – 2-year general program, often for those who want a shorter route to higher education.

✓ Choose this if:

- You enjoy academic subjects and want to go to university.
- You're not yet sure what job you want, but you want to keep options open.

2. Vocational Education and Training (Erhvervsuddannelser / EUD)

This combines school and apprenticeship in a company.

✓ Choose this if:

- You want to start working earlier and prefer practical learning.
- You're interested in becoming, for example, an electrician, mechanic, hairdresser, chef, carpenter, etc.

 **Bonus:** Some vocational programs also allow you to qualify for higher education later (via **EUX**, a combination of EUD and academic subjects).

Things to Think About:

- What subjects do you enjoy most?
- Do you prefer theory or hands-on/practical work?
- Do you want to go to university, or start working earlier?
- Are you interested in international opportunities (e.g., languages, business, tech)?

With your background:

Being fluent in Danish and having Turkish heritage is a strength! You could consider:

- International business (HHX)
- Language-focused STX (e.g., Danish, English, Turkish)
- Social sciences (STX) if you're interested in society, politics, or working with people
- Vocational training with a multicultural or language-related focus (like tourism, hospitality, or trade)

Next Steps:

1. **Visit educational fairs (uddannelsesmesser)** or open house events.
2. **Talk to an education counselor (UU-vejleder)** – they can help guide you based on your school grades, interests, and goals.
3. **Try a "brobygning" or internship** (praktik) to test out a path before committing.

Would you like help picking between some of these options based on your interests or strengths in specific subjects (like math, science, languages, etc.)?
