

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Türkiye. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great question, and it's good that you're thinking about your future now. Since you've finished **primary school** in Denmark (which typically ends around 9th or 10th grade, depending on the system), your next step depends on your interests, skills, and future goals. Here are your main **educational options** in Denmark after primary school:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic high school programs that prepare you for university:

A. STX (Studentereksamen)

- Focus: General academic subjects – humanities, social sciences, natural sciences.
- Good for: If you're not sure what you want yet or are interested in university later.

B. HHX (Higher Commercial Examination Programme)

- Focus: Business, economics, marketing, and international trade.
- Good for: If you like business, finance, or entrepreneurship.

C. HTX (Higher Technical Examination Programme)

- Focus: Science, technology, IT, and innovation.
- Good for: If you're interested in engineering, science, or technology.

D. HF (Higher Preparatory Examination)

- Shorter, 2-year version of STX, for more mature students or if you want to go to university without 3 years of high school.

🔧 2. EUD/Erhvervsuddannelse (Vocational Education and Training)

- Focus: Hands-on skills and trades like electrician, mechanic, hairdresser, chef, carpenter, etc.
- Structure: Combination of school and apprenticeship in a company.
- Good for: If you want to start working sooner and like practical tasks.

3. EUX (Combination of VET and Academic High School)

- Combines EUD (vocational training) with academic subjects like in STX.
- You become a skilled worker *and* get qualifications for university.
- Good for: If you want both options – work or study later.

So, what's best for you?

Ask yourself:

- Do you enjoy school subjects like history, science, languages, or math? → Consider STX or HTX.
- Do you love business or economics? → Consider HHX.
- Do you want to learn a practical skill and start earning earlier? → Consider EUD or EUX.
- Are you unsure but want to keep doors open? → STX or EUX can be flexible.

✨ **Special Tip (with your background in mind)**

Since you're fluent in Danish and have a Turkish background, you might also have **great language and cultural skills**. These can be useful in careers like:

- International business (HHX)
- Public service or diplomacy (STX)
- Tech with global focus (HTX)
- Working in multicultural environments (social work, healthcare, etc.)

If you'd like, tell me:

- What subjects you enjoy the most
- If you prefer theory or practical work
- Any dreams you have (even if they seem far away)

Then I can give you a more personal recommendation.
