

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Iran (Islamic Republic of). I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself—you're in an important and exciting phase of your life right now. In Denmark, after finishing primary school (9th or 10th grade), you typically have several good options to choose from, depending on your interests, goals, and strengths.

Here's a breakdown of the main **educational paths** you can consider:

♦ 1. Gymnasiale Uddannelser (Upper Secondary Education)

If you're academically inclined and possibly considering university later on, this is the standard route.

Main options:

- **STX** (*Alment Gymnasium*) – Broad, academic, general subjects like Danish, history, science, and languages.
- **HTX** (*Teknisk Gymnasium*) – Focuses on technology and science.
- **HHX** (*Handels gymnasium*) – Focus on business, economics, and international trade.
- **HF** (*Højere Forberedelseseksamen*) – Shorter (2 years), more practical/theoretical hybrid; good if you want a more direct route to further education.

Why choose this?

- Prepares you for university or higher education.
- Good if you enjoy academic subjects or want to keep your options open.

♦ 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

If you're more hands-on and interested in working in a trade or practical profession (e.g., electrician, chef, mechanic, hairdresser), this might be for you.

Why choose this?

- You learn both at school and on the job (apprenticeship).
- You can start working earlier or continue into higher vocational education (EUX, Erhvervsakademi).

♦ 3. EUX (Erhvervsfaglig studentereksamen)

This is a **combination** of vocational training and upper secondary education.

Why choose this?

- You get both a vocational qualification **and** a high school diploma.
- It's demanding but opens many doors—both to jobs and higher education.

What should guide your choice?

Here are a few questions to ask yourself:

- Do I enjoy studying and reading, or do I prefer practical, hands-on work?
- Do I want to go to university in the future?
- Am I interested in technology, science, business, or something creative?
- Would I rather start working and earning earlier?

Considering Your Background

Being fluent in Danish and growing up in Denmark gives you the same access and opportunities as your peers. Your Iranian heritage is also a strength—it can give you a broader cultural perspective, language skills, and an edge in fields like international business, law, or diplomacy if you choose.

You could also look into mentorship or community networks that support students with multicultural backgrounds—these sometimes offer career guidance and networking.

Example paths

- **Want to be a doctor, engineer, or lawyer?** → STX or HTX.
- **Interested in international business?** → HHX.
- **Prefer working with your hands but want the option to study later?** → EUX.
- **Want to become a hairdresser, mechanic, chef, etc.?** → EUD.

Would you like help narrowing this down based on your interests or strengths in school (e.g., favorite subjects, hobbies)? I can help match your preferences to specific options.
